

10 Routes up Snowdon.

Free map detailing the 10 most popular routes up Wales' tallest mountain from - www.walkeryri.org.uk.

Check out the website for more details on the walks.

DISCLAIMER! This map makes no claims to being accurate. It's meant as a rough guide to the routes that can be used with a PROPER Ordnance Survey or Harveys map. I take no responsibility for other's stupidity.

This Map was produced from height data freely available online using Trailgauge software to produce the contours. The Ordnance Survey do not allow their data to be used. Lakes and walk start locations are placed by a combination of optical observation and from personal GPS logs. Walks are from GPS logs. This map and all the text upon it is copyright 2007 Walkeryri (AKA T D Roberts) and may not be copied, passed off as your own work, etc, etc without my express permission. You may, however, print as many of these maps as you please so long as you pass them on without making a profit. Feel free to email the .pdf file too. But PLEASE, do not put it on your website to download. I'll be producing these maps for other areas in Snowdonia soon, with the intention of putting a reference number next to each route that corresponds to a route on www.walkeryri.org.uk.

Let me know if you like / hate it - dave@walkeryri.org.uk
